

<b>U.S. Department of Energy Energy Information Administration Form EIA-860 (2004)</b>	<b>ANNUAL ELECTRIC GENERATOR REPORT</b>	<b>Form Approved OMB No. 1905-0129 Approval Expires</b>		
<b>PURPOSE</b>	<p>Form EIA-860 collects data on the status of existing electric generating plants and associated equipment in the United States, and those scheduled for initial commercial operation within 5 years of the filing of this report. The data from this form appear in several EIA publications, including the <i>Electric Power Monthly</i>, <i>Electric Power Annual</i>, and the <i>Annual Energy Review</i>. The data collected on this form are used to monitor the current status and trends of the electric power industry and to evaluate the future of the industry.</p>			
<b>REQUIRED RESPONDENTS</b>	<p>All existing plants and proposed (5-year plans) plants that: 1) have a total generator nameplate capacity (sum for generators at a single site) of 1 MW or greater; and 2) where the generator(s), or the facility in which the generator(s) resides, is connected to the local or regional electric power grid and has the ability to draw power from the grid or deliver power to the grid are reported on Form EIA-860.</p> <p>In the case of generators located in Alaska and Hawaii which are not a part of the North American interconnected grid, generators that are connected to a "public grid," meaning a local or regional transmission or distribution system that supplies power to the public, must be reported on Form EIA-860.</p> <p>The operator or planned operator of jointly-owned plants should be the only respondent for those plants.</p>			
<b>RESPONSE DUE DATE</b>	<p>Submit the completed Form EIA-860 directly to the EIA annually, on or before February 15.</p>			
<b>METHODS OF FILING RESPONSE</b>	<p>Submit your data electronically using EIA's secure Internet Data Collection system (IDC). This system uses security protocols to protect information against unauthorized access during transmission.</p> <ul style="list-style-type: none"> <li>• If you have not registered with EIA's Single Sign-On system, send an e-mail requesting assistance to: <a href="mailto:EIA-860@eia.doe.gov">EIA-860@eia.doe.gov</a>.</li> <li>• If you have registered with Single Sign-On, log on at <a href="https://signon.eia.doe.gov/ssoserver/login">https://signon.eia.doe.gov/ssoserver/login</a></li> <li>• If you are having a technical problem with logging into the IDC or using the IDC contact the IDC Help Desk for further information. Contact the Help Desk at:</li> </ul> <p style="text-align: center;">E-Mail: <a href="mailto:CNEAFhelpcenter@eia.doe.gov">CNEAFhelpcenter@eia.doe.gov</a></p> <p style="text-align: center;">Phone: 202-287-1333</p> <ul style="list-style-type: none"> <li>• If you need an alternate means of filing your response, contact the Help Desk.</li> </ul> <p>Retain a completed copy of this form for your files.</p>			
<b>CONTACTS</b>	<p><b>Internet System Questions:</b> For questions related to the Internet Data Collection system, see the help contact information immediately above.</p> <p><b>Data Questions:</b> For questions about the data requested on Form EIA-860, contact either:</p> <table border="0" style="width: 100%;"> <tr> <td style="width: 50%; vertical-align: top;"> Kenneth McClevey  Telephone Number: (202) 287-1732  FAX Number: (202) 287-1960  Email: <a href="mailto:EIA-860@eia.doe.gov">EIA-860@eia.doe.gov</a> </td> <td style="width: 50%; vertical-align: top;"> Glenn McGrath  Telephone Number: (202) 287-1745  FAX Number: (202) 287-1960  Email: <a href="mailto:EIA-860@eia.doe.gov">EIA-860@eia.doe.gov</a> </td> </tr> </table>		Kenneth McClevey Telephone Number: (202) 287-1732 FAX Number: (202) 287-1960 Email: <a href="mailto:EIA-860@eia.doe.gov">EIA-860@eia.doe.gov</a>	Glenn McGrath Telephone Number: (202) 287-1745 FAX Number: (202) 287-1960 Email: <a href="mailto:EIA-860@eia.doe.gov">EIA-860@eia.doe.gov</a>
Kenneth McClevey Telephone Number: (202) 287-1732 FAX Number: (202) 287-1960 Email: <a href="mailto:EIA-860@eia.doe.gov">EIA-860@eia.doe.gov</a>	Glenn McGrath Telephone Number: (202) 287-1745 FAX Number: (202) 287-1960 Email: <a href="mailto:EIA-860@eia.doe.gov">EIA-860@eia.doe.gov</a>			

<b>U.S. Department of Energy</b> <b>Energy Information Administration</b> <b>Form EIA-860 (2004)</b>	<b>ANNUAL ELECTRIC GENERATOR</b> <b>REPORT</b>	<b>Form Approved</b> <b>OMB No. 1905-0129</b> <b>Approval Expires</b>
<b>GENERAL INSTRUCTIONS</b>	<p>Submit the completed Form EIA-860 directly to the EIA annually, on or before February 15.</p> <ol style="list-style-type: none"> <li>1. Verify all EIA provided information, including company and plant name, and plant and generator identification number. If incorrect, revise the incorrect entry and provide the correct information. State codes are two-letter U.S. Postal Service abbreviation. Provide any missing information. If filing a paper copy of this form, typed or legible handwritten entries are acceptable. Allow the original entry to remain readable. See more specific instructions for correcting data in Schedule 2, "Power Plant Data," and Schedule 3, "Generator Information."</li> <li>2. Check all data for consistency with the same or related data that appear in more than one schedule of this or other forms or reports submitted to EIA. Explain any inconsistencies under Schedule 6, "Footnotes."</li> <li>3. For planned power plants or generators, use planning data to complete the form.</li> <li>4. Report in whole numbers (i.e., no decimal points), except where explicitly instructed to report otherwise.</li> <li>5. Indicate negative amounts by using a minus sign before the number.</li> <li>6. Report date information as a two-digit month and four-digit year, e.g., "11 - 1980."</li> <li>7. Furnish the requested information to reflect the status of your current or planned operations as of the beginning of the reporting calendar year. <b>If the company no longer operates a specific power plant, report the current operator under Schedule 6, "Footnotes." Do not complete the form for that power plant.</b></li> <li>8. To request additional blank schedules contact the Energy Information Administration using the contact information on page I, or download the form from <a href="http://www.eia.doe.gov/cneaf/electricity/page/forms.html">http://www.eia.doe.gov/cneaf/electricity/page/forms.html</a>.</li> </ol>	
<b>ITEM-BY-ITEM INSTRUCTIONS</b>	<p style="text-align: center;"><b>Schedule 1. Identification</b></p> <ol style="list-style-type: none"> <li>1. For line 1, <b>Legal Name of Operator</b>, verify the name.</li> <li>2. For line 2, <b>Current Address of Principal Business Office of Plant Operator</b>, verify the principal name and address to which this form should be mailed. Include an attention line, room number, building designation, etc., to facilitate the future handling and processing of this form.</li> <li>3. For line 3, <b>Preparer's Legal Name</b>, verify the name to which this form should be mailed if different from line 1.</li> <li>4. For line 4, <b>Current Address of Preparer's Office</b>, verify the address to which this form should be mailed. Include an attention line, room number, building designation, etc., to facilitate the future handling and processing of this form, if preparer is different from operator in line 1.</li> <li>5. For line 5, <b>If Reporting Entity is an Electric Utility</b>, enter an "X" for the appropriate class of ownership.</li> </ol>	

**ITEM-BY-ITEM  
INSTRUCTIONS  
Continued**

**Schedule 2. Power Plant Data**

Verify or complete one section for each existing power plant and each power plant planned for initial commercial operation within 5 years. To report a new plant or a plant that is not already identified, use a separate (blank) section of Schedule 2.

1. For line 1, **Plant Name** and **EIA Plant Code**, enter the official or legal name of the power plant, and enter or verify the EIA Plant Code for the power plant. Each power plant must be uniquely identified. The type of plant does not need to be a part of the plant name, e.g., "Plant x Hydro" needs to be reported as "Plant x" only. The type of plant is recognized by the prime mover code(s) reported in Schedule 3, Generator Information. There may be more than one prime mover type associated with a single plant name (single site). Enter "NA 1," "NA 2," etc., for planned facilities that have no name(s).
2. **For line 2, Street Address**, enter or verify the street address of the power plant.
3. For line 3, **County Name and City Name**, enter the county and city in which the plant is (will be) located. Enter "NA" for planned facilities that have not been sited. If a mobile power plant indicate with a footnote on Schedule 6.
4. For line 4, **State**, enter the two-letter U.S. Postal Service abbreviation for the State in which the plant is located. Enter "NA" for planned facilities for which the State has not been determined. If the State is "NA," the county name must be "NA."
5. For line 5, **Zip Code**, enter the zip code of the plant. Provide, at a minimum, the five-digit zip code; however, the nine-digit code is preferred.
6. For line 6, **Latitude and Longitude**, enter the latitude and longitude of the plant in degrees, minutes, and seconds.
7. For line 7, **Enter Datum for Latitude and Longitude, if Known; Otherwise Enter "NA":**  
  
The longitude and latitude measurement for a location depends in part on the coordinate system (or "datum") the measurement is keyed to. "Datum systems" used in the United States, include the North American Datum 1927 (NAD27) and North American Datum 1983 (NAD83).  
  
If you know the datum system for the plant longitude and latitude, enter the system name (e.g., NAD83) on line 7. If you do not know the datum system used, enter NA.  
  
(For background information on datums and their uses, see:  
<http://biology.usgs.gov/geotech/documents/datum.html>)
8. For line 8, **NERC Region and NERC Subregion**, enter the NERC region and subregion in which the plant is located. A map of the NERC regions can be found on the Internet URL: [http://www.eia.doe.gov/cneaf/electricity/chg\\_str\\_fuel/html/fig02.html](http://www.eia.doe.gov/cneaf/electricity/chg_str_fuel/html/fig02.html).
9. For line 9, **Name of Water Source**, enter the name of the principal source from which cooling water for thermal-electric plants and water for generating power for hydroelectric plants is directly obtained. If more than one water source is (will be) used, enter the name(s) of the other sources of water under "Notes." Enter "Municipality" if the water is from a municipality. Enter "wells" if water is from wells. Enter "NA" for planned facilities for which the water source is not known.

**ITEM-BY-ITEM  
INSTRUCTIONS  
Continued**

**Schedule 2. Power Plant Data  
(Continued)**

10. For line 10, **Primary Purpose of the Plant**, enter the North American Industry Classification System (NAICS) code that best describes the primary purpose of the reporting plant. Electric utility plants will generally use code 22. Independent power producers whose sole or primary business is the sale of electricity will also generally use code 22. For industrial and commercial generators whose primary business is an industrial or commercial process (e.g., paper mills, refineries, chemical plants, etc.), use the table on pages 16 and 17 to select a NAICS code.
11. For line 11, **For Independent Power Producers and Combined Heat and Power Producers only**, enter the name of the electric utility service area within which the plant is located. If the plant is not connected, to this utility, check the appropriate box.

**Schedule 3. Generator Information**

1. Verify or complete for each existing or planned generator. Complete one column for each generator (up to three generators can be reported on one page) for all generators that are: (1) in commercial operation (whether active or inactive), or (2) expected to be in commercial operation within 5 years and is either planned, under construction, or in testing stage. Do not report auxiliary generators.
2. To report a new generator, use a separate (blank) section of Schedule 3. To report a new generator that has replaced one that is no longer in service, update the status of the generator that has been replaced along with other related information (e.g., retirement date), then use a separate (blank) section of Schedule 3 to report all of the applicable data about the new generator. Each generator must be uniquely identified within a plant. The EIA cannot use the same generator ID for the new generator that was used for the generator that was replaced.

**Schedule 3. Generator Information, Part A. Generators**

1. For line 1, **Plant Name**, enter the official or legal name of the power plant as reported on Schedule 2.
2. For line 2, **EIA Plant Code**, enter the EIA plant code as reported on Schedule 2.
3. For line 3, **Operator's Generator Identification**, enter the unique generator identification commonly used by plant management. Generator identification can have a maximum of four characters, and should be the same identification as reported on other EIA forms to be uniquely defined within a plant.
4. For line 4, **EIA Generator Code** is a code that will be assigned by EIA for its internal data processing purposes.

**ITEM-BY-ITEM  
INSTRUCTIONS  
Continued**

**Schedule 3. Generator Information, Part A. Generators  
(Continued)**

5. For line 5, **Prime Mover**, enter one of the prime mover codes below. For combined cycle units a prime mover code must be entered for each generator.

<b>Prime Mover Code</b>	<b>Prime Mover Description</b>
ST	Steam Turbine, including nuclear, geothermal and solar steam (does not include combined cycle)
GT	Combustion (Gas) Turbine (includes jet engine design)
IC	Internal Combustion Engine (diesel, piston, reciprocating)
CA	Combined Cycle Steam Part
CT	Combined Cycle Combustion Turbine Part (type of coal must be reported as energy source for integrated coal)
CS	Combined Cycle Single Shaft (combustion turbine and steam turbine share a single generator)
CC	Combined Cycle Total Unit (use only for plants/generators that are in planning stage, for which specific generator details cannot be provided)
HY	Hydraulic Turbine (includes turbines associated with delivery of water by pipeline)
PS	Hydraulic Turbine – Reversible (pumped storage)
BT	Turbines Used in a Binary Cycle (such as used for geothermal applications)
PV	Photovoltaic
WT	Wind Turbine
CE	Compressed Air Energy Storage
FC	Fuel Cell
OT	Other
NA	Unknown at this time (use only for plants/generators that are in planning stage, for which specific generator details cannot be provided.)

6. For line 6, **Unit Code** (Multi-generator code), identify all generators that are operated with other generators as a single unit. (Identify generators in Schedule 6, "Footnotes.") Generators operating as a single unit should have the same four-character unit (multi-generator code) code. These generators should have a single heat rate and (aggregate) capacity reported. The four-character unit code is entered by EIA. If generators do not operate as a single unit, this space should be left blank.
7. For line 7, **Ownership**, identify the ownership for each generator using the following codes: "S" for single ownership by respondent, "J" for jointly owned with another entity, or "W" for wholly owned by an entity other than respondent.
8. For line 8, **Is Any Part of this Generator Owned by an Entity that is Not an Electric Utility**, for each generator, check "yes" if any owner of the generator is not an electric utility, even if that owner(s) does not own a majority share of the generator; otherwise check "no." (See Glossary for definition of utility.)
9. For line 9, **Date of Sale, If Sold**, enter the month and year of the sale of the generator (e.g., 12-2001).
10. If data for line 9 are entered, the Legal Name, Business Address, Contact Person, and Telephone of the Entity to Which this Generator was Sold, must be reported in Schedule 6, Footnotes.
11. For line 10, **Can This Generator Deliver Power to the Transmission Grid**, indicate if the generator can or cannot deliver power to the transmission grid.

U.S. Department of Energy Energy Information Administration Form EIA-860 (2004)	<b>ANNUAL ELECTRIC GENERATOR REPORT</b>	Form Approved OMB No. 1905-0129 Approval Expires												
<b>Schedule 3. Generator Information, Part B. Existing Generators</b>														
<b>ITEM-BY-ITEM INSTRUCTIONS Continued</b>	<b>1. For line 1, <u>Generator Nameplate Capacity</u>, report the highest value on the nameplate in megawatts rounded to the nearest tenth. If the nameplate capacity is expressed in kilovolt amperes (kVA), convert to kilowatts by multiplying the power factor by the kVA, divide by 1,000 to express in megawatts to the nearest tenth.</b>													
	<b>2. For line 2, <u>Net Capacity</u>, enter the generator's (unit's) summer and winter net capacities for the primary energy sources. Report in megawatts, rounded to the nearest tenth. For generators that are out of service for an extended period or on standby or have no generation during the respective seasons report the estimated capacities based on historical performance.</b>													
	<b>3. For line 3, <u>Maximum Reactive Output (MVAR)</u>, enter maximum lagging reactive power output (MVARs) the generator is expected to achieve at the maximum expected real power output from the generator. Enter the values for both summer and winter conditions, even if the value does not differ by season. (A MVAR is a Mega Voltampere Reactive.).</b>													
	<b>4. For line 4, <u>Status Code</u>, enter one of the following status codes:</b>													
	<table border="0"> <tr> <td><b><u>Status Code</u></b></td> <td><b><u>Status Code Description</u></b></td> </tr> <tr> <td>BU</td> <td>Backup - Used only for test purposes, or in the event of an emergency, such as a shortage of power needed to meet customer load requirements.</td> </tr> <tr> <td>OP</td> <td>Operating - in service (commercial operation) and producing some electricity.</td> </tr> <tr> <td>SB</td> <td>Standby - available for service but not normally used (has little or no generation during the year).</td> </tr> <tr> <td>OS</td> <td>Out of service - units that could not be used for the reporting year, but are expected to be returned to service in the future.</td> </tr> <tr> <td>RE</td> <td>Retired - no longer in service and not expected to be returned to service.</td> </tr> </table>	<b><u>Status Code</u></b>	<b><u>Status Code Description</u></b>	BU	Backup - Used only for test purposes, or in the event of an emergency, such as a shortage of power needed to meet customer load requirements.	OP	Operating - in service (commercial operation) and producing some electricity.	SB	Standby - available for service but not normally used (has little or no generation during the year).	OS	Out of service - units that could not be used for the reporting year, but are expected to be returned to service in the future.	RE	Retired - no longer in service and not expected to be returned to service.	<p>If a generator is used for both standby (SB) and back-up (BU) purposes, assign the SB status code.</p>
	<b><u>Status Code</u></b>	<b><u>Status Code Description</u></b>												
	BU	Backup - Used only for test purposes, or in the event of an emergency, such as a shortage of power needed to meet customer load requirements.												
	OP	Operating - in service (commercial operation) and producing some electricity.												
	SB	Standby - available for service but not normally used (has little or no generation during the year).												
	OS	Out of service - units that could not be used for the reporting year, but are expected to be returned to service in the future.												
RE	Retired - no longer in service and not expected to be returned to service.													
<b>5. For line 5, <u>Synchronized to the Grid</u>, if the status code entered on line 5 is standby or back-up, please note if the generator is synchronized to the grid or not.</b>														
<b>6. For line 6, <u>Initial Date of Operation</u>, enter the month and year of initial commercial operation.</b>														
<b>7. For Line 7, <u>Retirement Date</u>, enter the date the generator was retired in month and year format.</b>														
<b>8. For line 8, <u>Is this generator associated with a Combined Heat and Power system (fuel input is used to produce both electricity and useful thermal output)?</u>, check either "Yes" or "No".</b>														
<b>9. For line 9, <u>Distributed Generator</u>, check "Yes" if the generator is considered to be a distributed generator, or check "No" otherwise.</b>														
<b>10. For line 10a, <u>Predominant Energy Source</u>, enter the energy source code for the fuel used in the largest quantity (Btus) during the reporting year to power the generator. For generators that are out of service for an extended period of time or on standby, report the energy sources based on the generator's latest operating experience. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions. For generators driven by turbines using steam that is produced from waste heat or reject heat, report the original energy source used to produce the waste heat (reject heat).</b>														
<b>11. For Line 10b, <u>Is this generator part of a solid fuel gasification system</u>, check yes or no as appropriate.</b>														

U.S. Department of Energy Energy Information Administration Form EIA-860 (2004)	<b>ANNUAL ELECTRIC GENERATOR REPORT</b>	Form Approved OMB No. 1905-0129 Approval Expires
ITEM-BY-ITEM INSTRUCTIONS Continued	Schedule 3. Generator Information, Part B. Existing Generators (Continued)	
	<ol style="list-style-type: none"> <li>12. For line 11, <b>Operational Transportation Modes for Predominant Energy Source</b>, enter up to three codes for the principal methods of transportation used or available for the predominant fuel during the reporting period. Select from the list of Transportation Mode Codes on page 15.</li> <li>13. For line 12, <b>Second Most Predominant Energy Source</b>, enter the energy source code for the energy source used in the second largest quantity (Btus) during the reporting year to power the generator. Include startup/flame stabilization fuels. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions. For generators driven by turbines using steam that is produced from waste heat or reject heat, report the original energy source used to produce the waste heat (reject heat).</li> <li>14. For line 13, <b>Operational Transportation Modes for Second Most Predominant Energy Source</b>, enter up to three codes for the principal methods of transportation used or available for the second most predominant energy source during the reporting period. Select from the list of Transportation Mode Codes on page 15.</li> <li>15. For line 14, <b>Other Energy Sources</b>, enter the codes for other energy sources actually used, or which could have been used, to power the generator in the reporting year. Enter up to four codes in order of quantity used (measured in Btus). Enter in order of their predominance of use, where predominance is based on quantity of Btu(s) consumed. Include energy source codes(s) that the generator was capable of using, although the energy source may not have been used for electricity generation during the last 12 months. For generators that are out of service for an extended period of time or on standby, report the energy sources based on the generator's latest operating experience. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions. For generators driven by turbines using steam that is produced from waste heat or reject heat, report the original energy source used to produce the waste heat (reject heat).</li> <li>16. For line 15, <b>If Energy Source is Wind</b>, enter the number of turbines.</li> <li>17. For line 16, <b>Tested Heat Rate</b>, enter the tested heat rate under full load conditions for all generators that derive their energy from combustion or fission of fuel. Report the heat rate as the fuel consumed in British thermal units (Btus) necessary to generate one net kilowatthour of electric energy. Report the tested heat rate under full load, not the actual heat rate, which is the quotient of the total Btu(s), consumed and total net generation. If generators are tested as a unit (not tested individually), report the same test result for each generator. For generators that are out of service for an extended period or on standby, report the heat rate based on the unit's latest test.</li> <li>18. For line 17, <b>Fuel Used for Heat Rate Test</b>, enter the fuel code or "M" for multiple fuels. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions. For generators driven by turbines using steam that is produced from waste heat or reject heat, report the original energy source used to produce the waste heat (reject heat).</li> <li>19. For line 18, <b>Ability to Use Multiple Fuels</b>, indicate if the combustion system that powers each generator has, in working order, the equipment necessary to either co-fire fuels or fuel switch. If the answer is "No", skip to Schedule 3, Part C, for this generator. (Co-firing means the simultaneous use of two or more fuels by a single combustion system to meet load. Fuel switching means the ability of a combustion system running on one fuel to replace that fuel in its entirety with a substitute fuel. Co-firing and fuel switching exclude the limited use of a second fuel for start-up or flame stabilization.)</li> <li>20. For line 19, <b>Ability to Co-Fire</b>, indicate whether or not the combustion system that powers the generator has, in working order, the equipment necessary to co-fire fuels.</li> </ol>	

<b>U.S. Department of Energy</b> <b>Energy Information Administration</b> <b>Form EIA-860 (2004)</b>	<b>ANNUAL ELECTRIC GENERATOR REPORT</b>	<b>Form Approved</b> <b>OMB No. 1905-0129</b> <b>Approval Expires</b>
--	---	---

**ITEM-BY-ITEM  
INSTRUCTIONS**  
**Continued**

**Schedule 3. Generator Information, Part B. Existing Generators  
(Continued)**

21. For line 20, **Fuel Options for Co-Firing**, indicate up to six fuels that can be co-fired. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions.
22. For line 21, **Ability to Co-Fire Oil and Gas**, indicate if the combustion system that powers the generator can co-fire fuel oil with natural gas. If it cannot, skip to line 23.
23. For line 22, **Ability to Co-Fire Oil**, indicate whether or not the combustion system that powers the generator can run on 100 percent oil. If yes, skip to line 23. If no, indicate the maximum percentage of the heat input to the combustion system (percent of MMBtu) that can be supplied by oil when co-firing with natural gas. Also provide the maximum output (summer net MW) that the unit can achieve, taking into account all applicable legal, regulatory, and technical limits, when making the maximum use of oil and co-firing natural gas.
24. For line 23, **Ability to Fuel Switch**, indicate whether or not the combustion system that powers the generator has, in working order, the equipment necessary to fuel switch. If no, then skip to Schedule 3, Part C, for this generator.
25. For line 24, **Oil – Gas Fuel Switching**, indicate a) whether or not the combustion system that powers the generator has, in working order, the equipment necessary to switch between oil and gas. If no, skip to line 26. If yes:
  - b) Enter the maximum output (summer net MW) that the unit can achieve, taking into account all applicable legal, regulatory, and technical limits, when running on natural gas.
  - c) Enter the maximum output (summer net MW) that the unit can achieve, taking into account all applicable legal, regulatory, and technical limits, when running on oil.
  - d) Enter how long it takes to switch the generator from using 100 percent natural gas to 100 percent oil.
26. For line 25, **Regulatory Limits on Operation**, indicate whether or not there are regulatory limits, related to pollution control, that limit the operation of each generator (e.g., limits on maximum output, limits on annual operating hours), when running on 100 percent oil.
27. For line 26, **Fuel Switching Options**, enter the codes for up to six fuels, including (if applicable) oil and gas, which can be used as a sole source of fuel to power each generator. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions.

**Schedule 3. Generator Information, Part C. Proposed Changes to Existing Generators**

1. For line 1, **Status Code**, enter one of the following status codes:
 

<b>Status Code</b>	<b>Status Code Description</b>
FC	Existing generator planned for conversion to another fuel or energy source
RP	Proposed for life extension or repowering
A	Proposed generator capability increase (rerating or relicensing)
D	Proposed generator capability decrease (rerating or relicensing)
M	Generator to be put in deactivated shutdown status
RA	Previously retired or deactivated generator planned for reactivation
RT	Existing generator scheduled for retirement
CO	Proposed change of ownership (including change of shares of jointly-owned units)
2. For line 2, **Generator Nameplate Capacity**, enter the highest value on the nameplate in megawatts rounded to the nearest tenth.

**ITEM-BY-ITEM  
INSTRUCTIONS  
Continued**

**Schedule 3. Generator Information, Part C. Proposed Changes to Existing Generators  
(Continued)**

3. For line 3, **Net Capacity**, enter the summer and winter capacities as specified below in megawatts rounded to the nearest tenth.  
  

<b><u>If Status Code is:</u></b>	<b><u>Then Enter:</u></b>
FC	The change in capacity (if any) expected to be realized from the conversion to the new energy sources.
A, D, RP	The change in capacity (if any) expected to be realized from the modification to the equipment.
RA	The capacity expected to be realized once the previously retired generator is reactivated.
M, RT	The decrease (negative value) in capacity for the generator being deactivated or retired.
4. For Line 4, **Planned Original Effective Date**, enter the month and year of the original effective date that: 1) the generator was scheduled to start operation after modification or reactivation; 2) the change of ownership was effective; 3) the generator was scheduled for deactivated shutdown status; or 4) the generator was scheduled for retirement. (Please note that this date does not change once it has been reported the first time.)
5. For line 5, **Planned Current Effective Date**, enter the month and year of the current effective date that the generator is scheduled to start operation after modification or reactivation, the month and year that the change of ownership is effective, the month and year that the generator is scheduled for deactivated shutdown status, or the month and year that the generator is scheduled for retirement.
6. For line 6, **New Prime Mover**, for existing generators with a status code of "RP", enter the prime mover code that is applicable once the modification is complete if it will be different from the current prime mover. Use the codes for prime mover provided under "Prime Mover," Schedule 3, Part A.
7. For line 7a, **Expected Predominant Energy Source**, enter the energy source code for the energy source expected to be used in the largest quantity (Btus) when the change is realized. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions.
8. For line 7b, **Will this generator be part of a solid fuel gasification system**, check yes or no as appropriate.
9. For line 8, **Operational Transportation Modes for Predominant Energy Source**, enter the expected available methods of transportation for fuel to the plant for the predominant fuel used in each generator during the reporting period. Select from the list of Transportation Mode Codes on page 15.
10. For line 9, **Expected Second Most Predominant Energy Source**, enter the energy source code for the energy source expected to be used in the second largest quantity (Btus) when the change is realized. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions.
11. For line 10, **Operational Transportation Modes for Second Most Predominant Energy Source**, enter the expected available methods of transportation for fuel to the plant for the second most predominant fuel used in each generator when the change is realized. Select from the list of Transportation Mode Codes on page 15.

**ITEM-BY-ITEM  
INSTRUCTIONS  
Continued**

**Schedule 3. Generator Information, Part C. Proposed Changes to Existing Generators  
(Continued)**

12. For line 11, **Other Energy Source Options**, enter the codes for other energy sources to be used at the plant to power the generator. Enter up to four codes in order of their expected predominance of use, where predominance is based on quantity of Btu(s) to be consumed. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions.

**Schedule 3. Generator Information, Part D. Proposed Generator**

1. For line 1, **Generator Nameplate Capacity**, enter the highest value on the nameplate in megawatts rounded to the nearest tenth.
2. For line 2, **Net Capacity**, enter the summer and winter capacities as specified below in megawatts rounded to the nearest tenth.

**If Status Code on Line 4 is:      Then Enter:**

TS, P, L, T, U, V	The capacity expected to be realized when the generator starts commercial operation.
-------------------	--

3. For line 3, **Maximum Reactive Output (MVAR)**, enter maximum lagging reactive power output (MVARs) the generator is expected to achieve at the maximum expected real power output from the generator. Enter the values for both summer and winter conditions, even if the value does not differ by season. (A MVAR is a Mega Voltampere Reactive.)
4. For line 4, **Status Code**, enter one of the following status codes:
- | <b><u>Status Code</u></b> | <b><u>Status Code Description</u></b>   |
|---------------------------|---|
| IP                        | Planned new generator canceled, indefinitely postponed, or no longer in resource plan                           |
| TS                        | Construction complete, but not yet in commercial operation (including lower power testing of nuclear units)     |
| P                         | Planned for installation but not under construction   |
| L                         | Regulatory approval pending. Not under construction (started site preparation)                                  |
| T                         | Regulatory approval received but not under construction   |
| U                         | Under construction, less than or equal to 50 percent complete (based on construction time to date of operation) |
| V                         | Under construction, more than 50 percent complete (based on construction time to date of operation)             |
| OT                        | Other (describe under "Notes")  |
5. For Line 5, **Planned Original Effective Date**, enter the month and year of the original effective date that: 1) the generator was scheduled to start operation after construction is completed. (Please note that this date does not change once it has been reported the first time.)
6. For line 6, **Planned Current Effective Date**, enter the month and year of the current effective date that the generator is scheduled to start operation.
7. For line 7, **Will this generator be associated with a Combined Heat and Power system (fuel input is used to produce both electricity and useful thermal output)?**, Check either "Yes" or "No."
8. For Line 8, **Distributed Generator**, check "Yes" if the generator is considered to be a distributed generator, and check "No" otherwise.

U.S. Department of Energy Energy Information Administration Form EIA-860 (2004)	<b>ANNUAL ELECTRIC GENERATOR REPORT</b>	Form Approved OMB No. 1905-0129 Approval Expires
<b>ITEM-BY-ITEM INSTRUCTIONS</b>  <b>Continued</b>	<b>Schedule 3. Generator Information, Part D. Proposed Generator (Continued)</b>	
	<ol style="list-style-type: none"> <li>9. For line 9a, <b>Expected Predominant Energy Source</b>, enter the energy source code for the energy source expected to be used in the largest quantity (Btus) when the generator starts commercial operation. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions.</li> <li>10. For line 9b, <b>Will this generator be part of a solid fuel gasification system</b>, check yes or no as appropriate.</li> <li>11. Select from the list of Transportation Mode Codes on page 15.</li> <li>12. For line 11, <b>Expected Second Most Predominant Energy Source</b>, enter the energy source code for the energy sources expected to be used in the second largest quantity (Btus) when the generator starts commercial operation. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions.</li> <li>13. For line 12, <b>Operational Transportation Modes for Second Most Predominant Energy Source</b>, enter the expected available methods of transportation for fuel to the plant for the predominant fuel used in each generator when the generator starts commercial operation. Select from the list of Transportation Mode Codes on page 15.</li> <li>14. For line 13, <b>Other Energy Source Options</b>, enter the codes for other energy sources that will be used at the plant to power the generator. Enter up to four codes in order of their expected predominance of use, where predominance is based on quantity of Btu(s) to be consumed. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions.</li> <li>15. For line 14, <b>If Energy Sources is Wind</b>, enter the number of turbines.</li> <li>16. For line 15, <b>Ability to Use Multiple Fuels</b>, indicate if the combustion system that will power each generator will have the equipment necessary to either co-fire fuels or fuel switch. If the answer is "No", skip to Schedule 3, Part D, for this generator. (Co-firing means the simultaneous use of two or more fuels by a single combustion system to meet load. Fuel switching means the ability of a combustion system running on one fuel to replace that fuel in its entirety with a substitute fuel. Co-firing and fuel switching exclude the limited use of a second fuel for start-up flame stabilization.)</li> <li>17. For line 16, <b>Ability to Co-Fire</b>, indicate whether or not the combustion system that will power the generator will have the equipment necessary to co-fire fuels. If no, skip to line 20.</li> <li>18. For line 17, <b>Fuel Options for Co-Firing</b>, indicate up to six fuels that the generator will be designed to co-fired. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions.</li> <li>19. For line 18, <b>Ability to Co-Fire Oil and Gas</b>, indicate if the combustion system that powers the generator will be able to co-fire fuel oil with natural gas. If it cannot, skip to line 20.</li> <li>20. For line 19, <b>Ability to Co-Fire Oil</b>, indicate whether or not the combustion system that will power the generator can run on 100 percent oil. If yes, skip to line 21, if no, indicate the maximum percentage of the heat input to the combustion system (percent of MMBtu) that will be able to be supplied by oil when co-firing with natural gas. Also provide the maximum output (summer net MW) that the unit is expected to achieve, taking into account all applicable legal, regulatory, and technical limits, when making the maximum use of oil and co-firing natural gas.</li> <li>21. For line 20, <b>Ability to Fuel Switch</b>, indicate whether or not the combustion system that will power the generator will have, in working order, the equipment necessary to fuel switch. If no, then skip to Schedule 3, Part D.</li> </ol>	

U.S. Department of Energy Energy Information Administration Form EIA-860 (2004)	<b>ANNUAL ELECTRIC GENERATOR REPORT</b>	Form Approved OMB No. 1905-0129 Approval Expires
---	---	--

**ITEM-BY-ITEM  
INSTRUCTIONS  
Continued**

**Schedule 3. Generator Information, Part D. Proposed Generator  
(Continued)**

22. For line 21, **Oil – Gas Fuel Switching**, indicate a) whether or not the combustion system that will power the generator will have, in working order, the equipment necessary to switch between oil and gas. If no, skip to line 23. If yes:

- b) Enter the maximum output (summer net MW) that the unit can achieve, taking into account all applicable legal, regulatory, and technical limits, when running on natural gas.
- c) Enter the maximum output (summer net MW) that the unit can achieve, taking into account all applicable legal, regulatory, and technical limits, when running on oil.
- d) Enter how long it takes to switch the generator from using 100 percent natural gas to 100 percent oil.

23. For line 22, **Regulatory Limits on Operation**, indicate whether or not there are regulatory limits, related to pollution control, that will limit the operation of each generator (e.g., limits on maximum output, limits on annual operating hours), when running on 100 percent oil.

24. For line 23, **Fuel Switching Options**, enter the codes for up to six fuels, including (if applicable) oil and gas, that can be used as a sole source of fuel to power each generator. Select appropriate energy source codes from the list on pages 14 and 15 of these instructions.

**Schedule 3. Generator Information, Part E. Federal Energy Regulatory Commission  
Generator Status**

1. Complete one schedule for the generators associated with each FERC qualifying plant or qualifying exempt wholesale generator. Up to three generators can be reported on one page.

2. On line 1, indicate whether or not the generator is a FERC Qualifying Facility or a FERC Qualifying Exempt Wholesale Generator. If the answer for a generator is NO, skip lines 2 through 5 for that generator. If the answer for a generator is YES, complete lines 2 through 5 for that generator.

**Schedule 4. Ownership Of Generators Owned Jointly Or By Others**

1. Complete a separate Schedule 4 for each existing and planned generator that is, or will be, jointly owned; each generator that the respondent operates but that is, or will be, jointly owned; and each generator that the respondent operates but is 100 percent owned by another entity. Only the current or planned operator of jointly-owned generators should complete this schedule. The total percentage of ownership must equal 100 percent.

2. For each jointly-owned generator, specify the **Plant Name, EIA Plant Code, and Generator Identification**, as listed on Schedule 3, Part A.

3. Enter the **Owner/Joint Owner Name and Address**, in order of percentage of ownership, of each jointly-owned generator. Enter the **EIA Code** for the owner, if known, otherwise leave blank. Enter the **Percent Owned** to two decimal places, i.e., 12.5 percent as “12.50.” If a generator is 100 percent owned by an entity other than the operator, then enter the percentage ownership as “100.00.”

4. Include any notes or comments on Schedule 6.

U.S. Department of Energy Energy Information Administration Form EIA-860 (2004)	<b>ANNUAL ELECTRIC GENERATOR REPORT</b>	Form Approved OMB No. 1905-0129 Approval Expires
<b>ITEM-BY-ITEM INSTRUCTIONS Continued</b>	<b>Schedule 5. New Generator Interconnection Information</b>	
	<ol style="list-style-type: none"> <li>1. Complete a separate Schedule 5 for each generator entering service during the past calendar year.</li> <li>2. For line 1, enter the name of the power plant and the EIA power plant code, as previously reported in Schedule 3., Part A.</li> <li>3. For line 2, enter the operator's generator identification, as previously reported in Schedule 3., Part B.</li> <li>4. For line 3, the EIA Generator Code is assigned by EIA for its internal data processing purposes.</li> <li>5. For Line 4, <b>Date of Actual Generator Interconnection</b>, report the month and year that the interconnection was put into place.</li> <li>6. For line 5, <b>Date of the Initial Interconnection Request</b>, report the month and year that the first request for interconnection was filed with the grid operator.</li> <li>7. For line 6, <b>Interconnection Site Location</b>, specify the nearest city or town, and the state, where the interconnection equipment is located.</li> <li>8. For line 7, <b>Grid Voltage at the Point of Interconnection</b>, specify the grid voltage, in kV, at the point of interconnection between the generator and the grid.</li> <li>9. For line 8, <b>Owner of the Transmission or Distribution Facilities Generator is Interconnected To</b>, provide the name of the owner of the transmission or distribution facilities with which the generator is interconnected. If the name of the owner of the facilities is unknown, provide the name of the contracting party.</li> <li>10. For line 9, <b>Total Cost Incurred for the Direct, Physical Interconnection</b>, specify the total cost incurred, in thousands of dollars, to accomplish the physical interconnection.</li> <li>11. For line 10, <b>Equipment Included in the Direct Interconnection Cost</b>, check each of the types of equipment that are included in the cost amount reported on line 6. If there are significant types of equipment that are not included in the list, please specify what additional equipment was needed for the interconnection in Schedule 6, Footnotes.</li> <li>12. For line 11, <b>Total Cost Incurred for Other Grid Enhancements and Reinforcements Needed to Accommodate Power Deliveries From the Generating Plant</b>, specify the amount incurred, in thousands of dollars, for any other grid enhancements or reinforcements that were needed to accommodate power deliveries from the new generating plant. If these costs, or some portion of these costs, will be repaid to your company at some time in the future by the owner of the grid, or the party with whom you contracted for the interconnection, please check "yes" in line 8 a.</li> <li>13. For line 12, <b>Were Specific Transmission Use Rights Secured As A Result Of The Interconnection Costs Incurred</b>, check yes or no.</li> <li>14. For line 9, <b>Were Specific Transmission Use Rights Secured as a Result of the Interconnection Costs Incurred</b>, if specified transmission use rights were secured, please check "yes".</li> </ol>	
	<p style="text-align: center;"><b>Schedule 6. Footnotes</b></p> <p>This schedule provides additional space for comments. Please identify schedule and line number for each comment.</p>

U.S. Department of Energy Energy Information Administration Form EIA-860 (2004)	<i><b>ANNUAL ELECTRIC GENERATOR REPORT</b></i>	<b>Form Approved</b> <b>OMB No. 1905-0129</b> <b>Approval Expires</b>
<b>GLOSSARY</b>	The glossary for this form is available online at the following URL: <a href="http://www.eia.doe.gov/cneaf/electricity/page/define.html">http://www.eia.doe.gov/cneaf/electricity/page/define.html</a>	
<b>SANCTIONS</b>	The timely submission of Form EIA-860 by those required to report is mandatory under Section 13(b) of the Federal Energy Administration Act of 1974 (FEAA) (Public Law 93-275), as amended. Failure to respond may result in a penalty of not more than \$2,750 per day for each civil violation, or a fine of not more than \$5,000 per day for each criminal violation. The government may bring a civil action to prohibit reporting violations, which may result in a temporary restraining order or a preliminary or permanent injunction without bond. In such civil action, the court may also issue mandatory injunctions commanding any person to comply with these reporting requirements. <b>Title 18 U.S.C. 1001 makes it a criminal offense for any person knowingly and willingly to make to any Agency or Department of the United States any false, fictitious, or fraudulent statements as to any matter within its jurisdiction.</b>	
<b>REPORTING BURDEN</b>	Public reporting burden for this collection of information is estimated to average 10.2 hours per response for electric utility respondents and 5.1 hours per response for nonutility respondents, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Energy Information Administration, Statistics and Methods Group, EI-70, 1000 Independence Avenue S.W., Forrestal Building, Washington, DC 20585-0670; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503. A person is not required to respond to the collection of information unless the form displays a valid OMB number.	
<b>CONFIDENTIALITY</b>	<p><b>The information contained on Schedule 2, Latitude and Longitude; and Schedule 3, Part B, Tested Heat Rate</b> will be kept confidential and not disclosed to the public to the extent that it satisfies the criteria for exemption under the Freedom of Information Act (FOIA), 5 U.S.C. §552, the DOE regulations, 10 C.F.R. §1004.11, implementing the FOIA, and the Trade Secrets Act, 18 U.S.C. §1905. The Energy Information Administration (EIA) will protect your information in accordance with its confidentiality and security policies and procedures.</p> <p>The Federal Energy Administration Act requires the EIA to provide company-specific data to other Federal agencies when requested for official use. The information reported on this form may also be made available, upon request, to another component of the Department of Energy (DOE); to any Committee of Congress, the General Accounting Office, or other Federal agencies authorized by law to receive such information. A court of competent jurisdiction may obtain this information in response to an order. The information may be used for any nonstatistical purposes such as administrative, regulatory, law enforcement, or adjudicatory purposes.</p> <p>Disclosure limitation procedures are applied to the statistical data published from EIA-860 confidential survey information to ensure that the risk of disclosure of identifiable information is very small.</p> <p>Any additional information reported on Form EIA-860 will not be treated as confidential and may be publicly released in identifiable form. In addition to the use of the information by EIA for statistical purposes, the information may be used for any nonstatistical purposes such as administrative, regulatory, law enforcement, or adjudicatory purposes.</p>

## SCHEDULE 2. POWER PLANT DATA

(EXISTING POWER PLANTS AND THOSE PLANNED FOR INITIAL COMMERCIAL OPERATION WITHIN 5 YEARS)

LINE	PLANT 1. (EXISTING OR PLANNED FOR INITIAL COMMERCIAL OPERATION WITHIN 5 YEARS)			
1	Plant Name		EIA Plant Code	
2	Street Address			
3	County Name		City Name:	
4	State			
5	Zip Code			
6	Latitude (Degrees, Minutes, Seconds)		Longitude (Degrees, Minutes, Seconds)	
7	Enter Datum for Latitude and Longitude, if Known; Otherwise Enter "NA"			
8	NERC Region		NERC Subregion	
9	Name of Water Source (For Purpose of Cooling or Hydroelectric)			
10	Primary Purpose of the Plant (North American Industry Classification System Code)			
11	For Independent Power Producers, and Combined Heat and Power Producers Only: Enter the electric utility in whose service area the plant is located. If not connected to an electric utility check "Not Connected" after utility name.			Utility Name:  Not connected to utility [ ]
PLANT 2. (EXISTING OR PLANNED FOR INITIAL COMMERCIAL OPERATION WITHIN 5 YEARS)				
1	Plant Name		EIA Plant Code	
2	Street Address			
3	County Name		City Name:	
4	State			
5	Zip Code			
6	Latitude (Degrees, Minutes, Seconds)		Longitude (Degrees, Minutes, Seconds)	
7	Enter Datum for Latitude and Longitude, if Known; Otherwise Enter "NA"			
8	NERC Region		NERC Subregion	
9	Name of Water Source (For Purpose of Cooling or Hydroelectric)			
10	Primary Purpose of the Plant (North American Industry Classification System Code)			
11	For Independent Power Producers, and Commercial and Industrial Generators Only: Enter the electric utility in whose service area the plant is located. If not connected to an electric utility check "Not Connected" after utility name.			Utility Name:  Not connected to utility [ ]
PLANT 3. (EXISTING OR PLANNED FOR INITIAL COMMERCIAL OPERATION WITHIN 5 YEARS)				
1	Plant Name		EIA Plant Code	
2	Street Address			
3	County Name		City Name:	
4	State			
5	Zip Code			
6	Latitude (Degrees, Minutes, Seconds)		Longitude (Degrees, Minutes, Seconds)	
7	Enter Datum for Latitude and Longitude, if Known; Otherwise Enter "NA"			
8	NERC Region		NERC Subregion	
9	Name of Water Source (For Purpose of Cooling or Hydroelectric)			
10	Primary Purpose of the Plant (North American Industry Classification System Code)			
11	For Independent Power Producers, and Commercial and Industrial Generators Only: Enter the electric utility in whose service area the plant is located. If not connected to an electric utility check "Not Connected" after utility name.			Utility Name:  Not connected to utility [ ]

Check if no change to preprinted data on this page. [ ]

REPORT FOR: < respondent name > < respondent id >

REPORTING PERIOD: As of January 1, 200x

PLANT 4. (EXISTING OR PLANNED FOR INITIAL COMMERCIAL OPERATION WITHIN 5 YEARS)									
1	Plant Name				EIA Plant Code				
2	Street Address								
3	County Name				City Name:				
4	State								
5	Zip Code								
6	Latitude (Degrees, Minutes, Seconds)				Longitude (Degrees, Minutes, Seconds)				
7	Enter Datum for Latitude and Longitude, if Known; Otherwise Enter "NA"								
8	NERC Region				NERC Subregion				
9	Name of Water Source (For Purpose of Cooling or Hydroelectric)								
10	Primary Purpose of the (North American Industry Classification System Code)								
11	For Independent Power Producers, and Commercial and Industrial Generators Only: Enter the electric utility in whose service area the plant is located. If not connected to an electric utility check "Not Connected" after utility name.								Utility Name:
									Not connected to utility [ ]
PLANT 5. (EXISTING OR PLANNED FOR INITIAL COMMERCIAL OPERATION WITHIN 5 YEARS)									
1	Plant Name				EIA Plant Code				
2	Street Address								
3	County Name				City Name:				
4	State								
5	Zip Code								
6	Latitude (Degrees, Minutes, Seconds)				Longitude (Degrees, Minutes, Seconds)				
7	Enter Datum for Latitude and Longitude, if Known; Otherwise Enter "NA"								
8	NERC Region				NERC Subregion				
9	Name of Water Source (For Purpose of Cooling or Hydroelectric)								
10	Primary Purpose of the (North American Industry Classification System Code)								
11	For Independent Power Producers, and Commercial and Industrial Generators Only: Enter the electric utility in whose service area the plant is located. If not connected to an electric utility check "Not Connected" after utility name.								Utility Name:
									Not connected to utility [ ]
PLANT 6. (EXISTING OR PLANNED FOR INITIAL COMMERCIAL OPERATION WITHIN 5 YEARS)									
1	Plant Name				EIA Plant Code				
2	Street Address								
3	County Name				City Name:				
4	State								
5	Zip Code								
6	Latitude (Degrees, Minutes, Seconds)				Longitude (Degrees, Minutes, Seconds)				
7	Enter Datum for Latitude and Longitude, if Known; Otherwise Enter "NA"								
8	NERC Region				NERC Subregion				
9	Name of Water Source (For Purpose of Cooling or Hydroelectric)								
10	Primary Purpose of the (North American Industry Classification System Code)								
11	For Independent Power Producers, and Commercial and Industrial Generators Only: Enter the electric utility in whose service area the plant is located. If not connected to an electric utility check "Not Connected" after utility name.								Utility Name:
									Not connected to utility [ ]

Check if no change to preprinted data on this page. [ ]

REPORTING PERIOD: As of January 1, 200x

### SCHEDULE 3. GENERATOR INFORMATION

(EXISTING GENERATORS AND THOSE PLANNED FOR INITIAL COMMERCIAL OPERATION WITHIN FIVE YEARS)

LINE	PART A. GENERATORS (Complete One Column for Each Generator, by Plant)			
1	Plant Name			
2	EIA Plant Code			
		Generator (a)	Generator (b)	Generator (c)
3	Operator's Generator Identification			
4	EIA Generator Code			
5	Prime Mover Code			
6	Unit Code			
7	Ownership Code			
8	Is Any Part of this Generator Owned by an Entity that is Not an Electric Utility?	[ ] Yes [ ] No	[ ] Yes [ ] No	[ ] Yes [ ] No
9	Date of Sale If Sold (MM-YYYY)			
10	Can This Generator Deliver Power to the Transmission Grid?	[ ] Yes [ ] No	[ ] Yes [ ] No	[ ] Yes [ ] No

### PART B. EXISTING GENERATORS (Complete One Column for Each Generator, by Plant)

		Generator (a)	Generator (b)	Generator (c)
1	Generator Nameplate Capacity (Megawatts)			
2	Net Capacity (Megawatts)			
	Summer			
	Winter			
3	Maximum Reactive Output (Lagging MVAR) At Expected Peak Output			
	Summer			
	Winter			
4	Status Code			
5	If Status Code is Standby or Backup, is the generator synchronized to the grid?	[ ] Yes [ ] No	[ ] Yes [ ] No	[ ] Yes [ ] No
6	Initial Date of Operation (MM-YYYY)			
7	Retirement Date (MM-YYYY)			
8	Is this generator associated with a Combined Heat and Power system (fuel input is used to produce both electricity and useful thermal output)?	[ ] Yes [ ] No	[ ] Yes [ ] No	[ ] Yes [ ] No
9	Is this a Distributed Generator?	[ ] Yes [ ] No	[ ] Yes [ ] No	[ ] Yes [ ] No

REPORT FOR: < respondent name > < respondent id >

REPORTING PERIOD: As of January 1, 200x

**Energy Sources**

10a	<b>Predominant Energy Source</b>												
10b	<b>Is this generator part of a Solid Fuel Gasification system?</b>	<input type="checkbox"/> Yes <input type="checkbox"/> No				<input type="checkbox"/> Yes <input type="checkbox"/> No				<input type="checkbox"/> Yes <input type="checkbox"/> No			
11	<b>Operational Transportation Modes for Predominant Energy Source</b> (enter up to three codes)												
12	<b>Second Most Predominant Energy Source</b>												
13	<b>Operational Transportation Modes for Second-Most Predominant Energy Source</b> (enter up to three codes)												
14	<b>Other Energy Sources</b> Enter up to four codes in order of quantity used (measured in Btus).	a	b	c	d	a	b	c	d	a	b	c	d
15	<b>If Energy Source is Wind, Enter the Number of Turbines</b>												
16	<b>Tested Heat Rate (Btu/Kilowatthour)</b>												
17	<b>Fuel Used for Heat Rate Test</b> (enter fuel code or M for multiple fuels)												

**Fuel Switching and Co-Firing Capability**

18	<b>Ability to use multiple fuels</b> Does the combustion system that powers this generator have, <b>in working order</b> , the equipment necessary to either co-fire fuels or to fuel switch, including fuel storage facilities?	<input type="checkbox"/> Yes <input type="checkbox"/> No				<input type="checkbox"/> Yes <input type="checkbox"/> No				<input type="checkbox"/> Yes <input type="checkbox"/> No			
		If No, skip to Schedule 3 Part C.				If No, skip to Schedule 3 Part C.				If No, skip to Schedule 3 Part C.			
19	<b>Ability to Co-Fire</b> <b>Can the unit co-fire fuels?</b> (Note: co-firing excludes the limited use of an alternative fuel for startup or flame stabilization.)	<input type="checkbox"/> Yes <input type="checkbox"/> No If No, skip to line 23.				<input type="checkbox"/> Yes <input type="checkbox"/> No If No, skip to line 23.				<input type="checkbox"/> Yes <input type="checkbox"/> No If No, skip to line 23.			
20	<b>Fuel Options for Co-Firing</b> Enter the codes for up to six fuels that can be co-fired:	a	b	c	a	b	c	a	b	c			
		d	e	f	d	e	f	d	e	f			
21	<b>Ability to Co-Fire Oil and Gas</b> Can the unit co-fire fuel oil with natural gas?	<input type="checkbox"/> Yes <input type="checkbox"/> No If No, skip to line 23.				<input type="checkbox"/> Yes <input type="checkbox"/> No If No, skip to line 23.				<input type="checkbox"/> Yes <input type="checkbox"/> No If No, skip to line 23.			

REPORT FOR: < respondent name > < respondent id >

REPORTING PERIOD: As of January 1, 200x

22	<b>Ability to Co-Fire Oil</b> a. Can the unit run on 100% oil? <b>If Yes, skip to Line 23.</b> <b>If No, what is the:</b> • b. Maximum oil heat input (% of MMBtus) when co-firing with natural gas? • c. Maximum output (net MW) achievable, when making the maximum use of oil and co-firing natural gas?	<input type="checkbox"/> Yes <input type="checkbox"/> No  _____%  ____ MW	<input type="checkbox"/> Yes <input type="checkbox"/> No  _____%  ____ MW	<input type="checkbox"/> Yes <input type="checkbox"/> No  _____%  ____ MW						
23	<b>Ability to Fuel Switch</b> Can the unit fuel switch?	<input type="checkbox"/> Yes <input type="checkbox"/> No If No, skip to Sch. 3 Part C.	<input type="checkbox"/> Yes <input type="checkbox"/> No If No, skip to Sch. 3 Part C.	<input type="checkbox"/> Yes <input type="checkbox"/> No If No, skip to Sch. 3 Part C.						
24	<b>Oil – Gas Fuel Switching</b> a. Can the unit switch between oil and gas? <b>If No, skip to line 26.</b> <b>If Yes:</b> • b. Net summer MW achievable when running on natural gas: • c. Net summer MW achievable when running on fuel oil: • d. Time Required to Switch this unit from using 100 percent natural gas to using 100 percent oil (check one box):	<input type="checkbox"/> Yes <input type="checkbox"/> No  ____ MW ____ MW  <input type="checkbox"/> 0 to 6 hours <input type="checkbox"/> over 6 to 24 hours <input type="checkbox"/> over 24 to 72 hours <input type="checkbox"/> over 72 hours. <input type="checkbox"/> Unknown or uncertain	<input type="checkbox"/> Yes <input type="checkbox"/> No  ____ MW ____ MW  <input type="checkbox"/> 0 to 6 hours <input type="checkbox"/> over 6 to 24 hours <input type="checkbox"/> over 24 to 72 hours <input type="checkbox"/> over 72 hours. <input type="checkbox"/> Unknown or uncertain	<input type="checkbox"/> Yes <input type="checkbox"/> No  ____ MW ____ MW  <input type="checkbox"/> 0 to 6 hours <input type="checkbox"/> over 6 to 24 hours <input type="checkbox"/> over 24 to 72 hours <input type="checkbox"/> over 72 hours. <input type="checkbox"/> Unknown or uncertain						
25	<b>Regulatory Limits on Operation</b> Do pollution control regulations limit the operation of this unit when running on 100 percent oil (e.g., limits on number of operating hours per year or maximum allowed MW output)?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No						
26	<b>Fuel Switching Options</b> Enter the codes for up to six fuels that can be used as a sole source of fuel for this unit.	a	b	c	a	b	c	a	b	c
		d	e	f	d	e	f	d	e	f

REPORT FOR: < respondent name > < respondent id >

REPORTING PERIOD: As of January 1, 200x

**PART C. PROPOSED CHANGES TO EXISTING GENERATORS**

(Complete One Column for Each Generator, by Plant. If More Than One Change is Planned for a Generator, Copy This Form and Fill it Out For Each Change)

		Generator (a)	Generator (b)	Generator (c)
1	Status Code			
2	Generator Nameplate Capacity (Megawatts)			
3	Net Capacity (Megawatts)			
	Summer			
	Winter			
4	Planned Original Effective Date (MM-YYYY)			
5	Planned Current Effective Date (MM-YYYY)			
6	New Prime Mover Code			

**Energy Sources**

7a	Expected Predominant Energy Source												
7b	Will this generator be part of a Solid Fuel Gasification system?	[ ] Yes [ ] No	[ ] Yes [ ] No	[ ] Yes [ ] No									
8	Operational Transportation Modes for Predominant Energy Source (enter up to three codes)												
9	Expected Second Most Predominant Energy Source												
10	Operational Transportation Modes for Second-Most Predominant Energy Source (enter up to three codes)												
11	Other Energy Source Options. Enter up to four codes in order of expected quantity used (measured in Btus).	a	b	c	d	a	b	c	d	a	b	c	d

<b>U.S. Department of Energy</b> <b>Energy Information Administration</b> <b>Form EIA-860 (2004)</b>	<b>ANNUAL ELECTRIC GENERATOR</b> <b>REPORT</b>	<b>Form Approved</b> <b>OMB No. 1905-0129</b> <b>Approval Expires</b>
<b>REPORT FOR:</b> < respondent name > < respondent id >		
<b>REPORTING PERIOD:</b> As of January 1, 200x		

PART D. PROPOSED GENERATORS														
(Complete One Column for Each Generator, by Plant.)														
		Generator (a)				Generator (b)				Generator (c)				
1	Generator Nameplate Capacity (Megawatts)													
2	Net Capacity (Megawatts)	Summer												
		Winter												
3	Maximum Reactive Output (Lagging MVAR) At Expected Peak Output	Summer												
		Winter												
4	Status Code													
5	Planned Original Effective Date (MM-YYYY)													
6	Planned Current Effective Date (MM-YYYY)													
7	Will this generator be associated with a Combined Heat and Power system (fuel input is used to produce both electricity and useful thermal output)?		[ ] Yes [ ] No		[ ] Yes [ ] No		[ ] Yes [ ] No		[ ] Yes [ ] No		[ ] Yes [ ] No			
8	Will this be a Distributed Generator (Check Yes or No)		[ ] Yes [ ] No		[ ] Yes [ ] No		[ ] Yes [ ] No		[ ] Yes [ ] No		[ ] Yes [ ] No			
Planned Energy Sources														
9a	Expected Predominant Energy Source													
9b	Will this generator be part of a Solid Fuel Gasification system?		[ ] Yes [ ] No		[ ] Yes [ ] No		[ ] Yes [ ] No		[ ] Yes [ ] No		[ ] Yes [ ] No			
10	Operational Transportation Modes for Predominant Energy Source (enter up to three codes)													
11	Expected Second Most Predominant Energy Source													
12	Operational Transportation Modes for Second-Most Predominant Energy Source (enter up to three codes)													
13	Other Energy Source Options. Enter up to four codes in order of expected quantity used (measured in Btus).		a	b	c	d	a	b	c	d	a	b	c	d
14	If Energy Source Is Wind Enter The Number Of Turbines													

**REPORTING PERIOD:** As of January 1, 200x

### Combustible Fuel Capability

15	<b>Ability to use multiple fuels</b> Will the combustion system that powers this generator have, <b>in working order</b> , the equipment needed to either co-fire fuels or to fuel switch, including fuel storage facilities?	<input type="checkbox"/> Yes <input type="checkbox"/> No  If No, skip to Sch. 3 Part E.			<input type="checkbox"/> Yes <input type="checkbox"/> No  If No, skip to Sch. 3 Part E.			<input type="checkbox"/> Yes <input type="checkbox"/> No  If No, skip to Sch. 3 Part E.			
16	<b>Ability to Co-Fire</b> <b>Will the unit be able to co-fire fuels?</b> (Note: co-firing excludes the limited use of an alternative fuel for startup or flame stabilization.)	<input type="checkbox"/> Yes <input type="checkbox"/> No  If No, skip to line 20.			<input type="checkbox"/> Yes <input type="checkbox"/> No  If No, skip to line 20.			<input type="checkbox"/> Yes <input type="checkbox"/> No  If No, skip to line 20.			
17	<b>Fuel Options for Co-Firing</b> Enter the codes for up to six fuels that can be co-fired:	<b>a</b>	<b>b</b>	<b>C</b>	<b>a</b>	<b>b</b>	<b>c</b>	<b>a</b>	<b>b</b>	<b>C</b>	
		<b>d</b>	<b>e</b>	<b>f</b>	<b>d</b>	<b>e</b>	<b>f</b>	<b>d</b>	<b>e</b>	<b>f</b>

3	EIA Generator Code			
4	Date Of Actual Generator Interconnection (MM-YYYY)			
5	Date Of The Initial Interconnection Request (MM-YYYY)			
6	Interconnection Site Location (Nearest City or Town, State)	City: State:	City: State:	City: State:
7	Grid Voltage At The Point Of Interconnection (kV)			
8	Owner Of The Transmission Or Distribution Facilities To Which Generator is Interconnected			
9	Total Cost Incurred For The Direct, Physical Interconnection (Thousand \$)			
10	Equipment Included In The Direct Interconnection Cost (Check All Of The Following That Apply:)			
	a. Transmission Or Distribution Line:	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No
	b. Transformer	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No
	c. Protective Devices	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No
	d. Substation Or Switching Station	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No
	e. Other Equipment (specify in Sch. 6, Footnotes)	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No
11	a. Total Cost For Other Grid Enhancements/ Reinforcements Needed To Accommodate Power Deliveries From the Generator (Thousand \$)			
	b. Will This Cost Be Repaid?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No
12	Were Specific Transmission Use Rights Secured As A Result Of The Interconnection Costs Incurred?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No

**REPORTING PERIOD:** As of January 1, 200x
